

# Package ‘MethylAidData’

October 16, 2025

**Type** Package

**Title** MethylAid-summarized data for 2800 Illumina 450k array samples  
and 2620 EPIC array samples

**Version** 1.40.0

**Date** 2018-03-24

**Author** Davy Cats, Tyler J. Gorrie-Stone, Bastiaan T. Heijmans, John  
W. Holloway, BIOS Consortium, Maarten van Iterson, Faisal I. Rezwan,  
Leonard Schalkwyk

**Maintainer** M. van Iterson <mviterson@gmail.com>

**Description** A data package containing summarized Illumina 450k array  
data on 2800 samples and summarized EPIC data for 2620  
samples. The data can be use as a background data set in the  
interactive application.

**License** GPL (>= 2)

**VignetteBuilder** knitr

**biocViews** ExperimentData, TechnologyData, MicroarrayData,  
MethylationArrayData

**Depends** MethylAid, R (>= 3.2)

**Suggests** BiocParallel, BiocStyle, knitr, minfiData, minfiDataEPIC

**NeedsCompilation** no

**RoxygenNote** 6.0.1

**git\_url** <https://git.bioconductor.org/packages/MethylAidData>

**git\_branch** RELEASE\_3\_21

**git\_last\_commit** dfcde38

**git\_last\_commit\_date** 2025-04-15

**Repository** Bioconductor 3.21

**Date/Publication** 2025-10-16

Description

Summarized 450K dataon 2800 samples. The data can be use as a background data set in the interactive application.

Usage

exampleDataLarge

Format

summarizedData-object

Value

Pre-summarizedData object on 2800 450k Human Methylation samples.

Examples

```
library(MethylAid)
data(exampleDataLarge)
data(exampleData)
## Not run: visualize(exampleData, background=exampleDataLarge)
library(minfiData)
baseDir <- system.file("extdata", package="minfiData")
targets <- read.metharray.sheet(baseDir)
data <- summarize(targets)
## Not run: visualize(data, background=exampleDataLarge)
```

---

|                   |                                                                      |
|-------------------|----------------------------------------------------------------------|
| MethylAidDataEPIC | <i>summarizedData object for 2620 EPIC Human Methylation samples</i> |
|-------------------|----------------------------------------------------------------------|

---

**Description**

Summarized EPIC data for 2620 samples. The data can be use as a background data set in the interactive application.

**Usage**

```
MethylAidDataEPIC
```

**Format**

summarizedData-object

**Value**

Pre-summarizedData object for 2620 EPIC Human Methylation samples.

**Examples**

```
data(MethylAidDataEPIC)
library(minfiDataEPIC)
baseDir <- system.file("extdata", package="minfiDataEPIC")
targets <- read.metharray.sheet(baseDir)
data <- summarize(targets)
## Not run: visualize(data, background=MethylAidDataEPIC)
```
