

# Package ‘ITALICSData’

December 16, 2025

**Version** 2.48.0

**Date** 2008-05-01

**Title** ITALICSData

**Depends** R (>= 2.0.0)

**Author** Guillem Rigai

**Maintainer** Guillem Rigai <italics@curie.fr>

**Description** Data needed to use the ITALICS package

**License** GPL

**URL** <http://bioinfo.curie.fr>

**biocViews** ExperimentData, HapMap

**git\_url** <https://git.bioconductor.org/packages/ITALICSData>

**git\_branch** RELEASE\_3\_22

**git\_last\_commit** e11b5f9

**git\_last\_commit\_date** 2025-10-29

**Repository** Bioconductor 3.22

**Date/Publication** 2025-12-16

## Contents

|                              |          |
|------------------------------|----------|
| Hind.QuartetEffect . . . . . | 1        |
| Nsp.QuartetEffect . . . . .  | 2        |
| quartet . . . . .            | 2        |
| snpInfo . . . . .            | 2        |
| Sty.QuartetEffect . . . . .  | 2        |
| Xba.QuartetEffect . . . . .  | 2        |
| <b>Index</b>                 | <b>3</b> |

---

|                    |                           |
|--------------------|---------------------------|
| Hind.QuartetEffect | <i>Hind.QuartetEffect</i> |
|--------------------|---------------------------|

---

## Description

It contains computed quartet effect for Hind array. Those were computed on some normal samples of the hapmap dataset.

---

|                   |                          |
|-------------------|--------------------------|
| Nsp.QuartetEffect | <i>Nsp.QuartetEffect</i> |
|-------------------|--------------------------|

---

### Description

It contains computed quartet effect for Nsp array. Those were computed on some normal samples of the hapmap dataset.

---

|         |                                              |
|---------|----------------------------------------------|
| quartet | <i>Quartet Info example for the vignette</i> |
|---------|----------------------------------------------|

---

### Description

An example for the vignette

### Usage

```
data(quartetInfo)
```

---

|         |                                          |
|---------|------------------------------------------|
| snpInfo | <i>snp Info example for the vignette</i> |
|---------|------------------------------------------|

---

### Description

An example for the vignette

### Usage

```
data(snpInfo)
```

---

|                   |                          |
|-------------------|--------------------------|
| Sty.QuartetEffect | <i>Sty.QuartetEffect</i> |
|-------------------|--------------------------|

---

### Description

It contains computed quartet effect for Sty array. Those were computed on some normal samples of the hapmap dataset.

---

|                   |                          |
|-------------------|--------------------------|
| Xba.QuartetEffect | <i>Xba.QuartetEffect</i> |
|-------------------|--------------------------|

---

### Description

It contains computed quartet effect for Xba array. Those were computed on some normal samples of the hapmap dataset.
